CEDAR CITY HISTORIC DOWNTOWN

Cedar City, Utah
1500 Linear Feet
Client. Cedar City
Scope. Streetscape
Improvements
Completion. 1997

As Cedar City's downtown became more and more popular, the City desired Main Street be upgraded to accommodate the growing popularity. Cedar City commissioned MGB+A to develop guidelines and plans of improvements for the downtown area to make it more colorful and welcoming to visitors. MGB+A made recommendations for building materials, color palettes and signage guidelines, proposed awning and treatments for each store front, and recommendations for parking and pedestrian circulation throughout the downtown area. Street furniture including lighting, trash receptacles, bollards, benches and a clock tower were installed throughout to give consistency and a historic theme to the downtown area.
