CITY CREEK CENTER STREETScape

Salt Lake City, Utah
4600 Linear Feet
Client. Church of
Jesus Christ of Latter-day
Saints
Scope. Streetscape
Improvements
Completion. Spring
2012

MGB+A was part of the landscape architectural team who designed the City Creek Center lead by SWA. MGB+A's responsibility for the project included all of the streetscape around both blocks, street medians and crosswalks, plant material, and irrigation for all planting beds.

MGB+A was responsible for close coordination with Salt Lake City to ensure that the City's streetscape standard was integrated through both blocks 75 and 76. The greatest challenge was the coordination of the threshold and utility connections with numerous architects, utility companies, UTA and LDS Church Officials.
