

Urban Design

DRIGGS - 300 MAIN

Driggs, Idaho

13 Acres

Client. Teton Valley
Realty/TC Horizons

Scope. Master Plan for a
Mixed Use Community

Completion. Fall 2007

The developers of this site desired to incorporate a visionary plan to develop the first mixed-use project of the region in the small town of Driggs, Idaho. This cutting edge project near Grand Targhee Ski Resort will create a main street character in the heart of the town, where previously there had been no place designated the town center. MGB+A created a project with a welcoming, sophisticated frontage into Main Street as well as inviting internal streets with comfortable, beautiful streetscape enhancements. It also features a new civic space for public gatherings and celebrations. These site amenities are of equal importance in creating interesting public spaces and a positive image site-wide. This planting design includes areas more formal and areas very natural, but utilizes native and natural-appearing plants throughout.
